

Complaint Regarding Library Facilities

To
The Librarian / Administration,
[Institution Name]

Subject: Complaint regarding inadequate library facilities.

Respected Sir/Madam,

I am writing to formally express my concern regarding several issues in the institution's library. The library is an essential resource for students, but currently there are multiple problems that are affecting the study environment and accessibility of learning materials.

Firstly, the availability of important academic books is very limited. Many required textbooks and reference materials are either unavailable or insufficient in number for the students who need them. Secondly, the library seating and study space are not adequate during peak hours, making it difficult for students to find a proper place to study. Additionally, the internet and computer facilities in the library are either slow or not functioning properly.

Another concern is the lack of proper maintenance and organization of books. Some books are misplaced or difficult to locate due to improper cataloging. This results in students spending unnecessary time searching for resources.

I kindly request the administration to take necessary steps to improve the library facilities, increase the number of essential books, maintain proper organization, and ensure that the study environment remains quiet and comfortable for all students.

I hope the institution will consider this complaint seriously and take appropriate action at the earliest.

Thank you for your attention.

Sincerely,
[Your Name]
